Standards Australia

Please see back for Features and Technical Specifications.

Designed for maximum continuous operating reliability and manoeuvrability in smaller areas, 'Terminator' is the result of 10 years experience in carpet extraction technology. All the features of many larger units.

One or two motor configuration

1100 watts of extraction power ensures a professional result every time.

150 psi pressure ensures deep penetration of the solution down to embedded grit and grime.

Ultra Compact

Terminator's low height (83cm) means it can easily fit into most station wagons and hatchbacks.

5 metre hose ...for extra coverage

Clear dome - a powerful demonstration of Terminator's extraction power

Get a clear picture of the solution pickup ...and all the grit and grime being removed.

Perfect for showing Clients how thoroughly their carpet is being cleaned.

55 & 20 litre tank capacity

55 litre solution and 20 litre recovery polypropylene tanks ensures more time on-the-job, with less refilling or emptying.

Over 120 Distributors in Australia, New Zealand and worldwide

Every Polivac product is backed by a national and international network, so you can be confident of service, repairs or parts supply being turned around ...fast!

Fibreglass body and aluminium frame – ultra strong, lightweight

Rounded design 'Euro-style' fibreglass body ensures reduced risk of damage to furniture and fittings. Durability 'plus' with Terminator's aluminium frame.

4 Castor wheels = maximum manoeuvrability.

Four omnidirectional castors makes moving the machine on the job or transporting, smooth and easy. With one lockable wheel as a brake, 'Terminator' is 100% stable as well as easy to use ...and move.

2 jet wand

Professional grade wand with brass head and couplings is 'standard'.

Optional upholstery tool

Take on more jobs with the optional 'professional grade' upholstery tool for 'deep-cleaning' of upholstery and material fittings.

TECHNICAL SPECIFICATIONS

VACUUM SYSTEM	2-1100 watt 2 stage vac motors
